

NOVEMBER OPERATIONS REPORT

CONTROLLED SOLIDS — URBAN SPREADING
No Application

CLASS B FARMLAND SPREADING
<u>Calumet</u> 2,098.96 WT

FARMER/RESIDENT CONTACTS

Synagro has worked with existing MWRDGC farmers to expand acres to the MWRDGC program:

Graham Gletty	110
Matt Kellogg	100
Larry Domagolla	110
Ed Mundt	80

ODOR MINIMIZATION

For the landowner notifications. In November, Synagro sent out approximately 12 letters notifying adjacent landowners of biosolids applications in their area. Synagro team members knocked on 5 doors within a ¼ mile of permitted fields to educate residents about the benefits of biosolids application to farmland. No complaints were received and to minimize odor complaints, Synagro does not exceed 24 hours field storage and incorporates in 6 hours or less after application.

Rains end, but floodwaters continue rising

Storm total rainfall that reached as much as 6 to 8 inches from St. Louis to east central Illinois will continue to produce flooding for a lengthy period of time over much of southern and central Illinois.

The Coast Guard on Tuesday closed a 5-mile (8 km) section of the Mississippi River near St. Louis, Missouri, to all vessel traffic as rising river levels created "hazardous conditions," the agency said in a release. The river was closed from mile markers 184 to 179, an area roughly defined by Madison County, Illinois, to the north and St. Louis to the south

The National Weather Service says some major rivers will flood for many days, while smaller rivers and other areal flooding will diminish over the next few days. NWS river forecasts calls for flood crests to tie or exceed levels reached during the Great Flood of 1993.
