

NOVEMBER OPERATIONS REPORT

CONTROLLED SOLIDS — URBAN SPREADING
<u>LASMA VULCAN</u> 91.98 WT

CLASS B FARMLAND SPREADING
<u>CALUMET</u> 1,091 WT

FARMER/RESIDENT CONTACTS

Synagro has worked with existing MWRDGC farmers to expand acres to the MWRDGC program:

Justin Langlois	100
Matt Kellogg	100

ODOR MINIMIZATION

For the landowner notifications. In November Synagro sent out approximately 5 letters notifying adjacent landowners of biosolids applications in their area. Synagro team members knocked on 4 doors within a ¼ mile of permitted fields to educate residents about the benefits of biosolids application to farmland. No complaints were received and to minimize odor complaints, Synagro does not exceed 24 hours field storage and incorporates in 6 hours or less after application.

Illinois Crop Progress and Condition

Released November 26 2018

There were 2.8 days suitable for fieldwork during the week ending November 25, 2018. Statewide, the average temperature was 38.5 degrees, 1.0 degrees below normal. Precipitation averaged 0.43 inches, 0.27 inches below normal. Topsoil moisture supply was rated at 2 percent short, 72 percent adequate, and 26 percent surplus. Subsoil moisture supply was rated at 8 percent short, 78 percent adequate, and 14 percent surplus. Sorghum harvested was at 94 percent, compared to the 5-year average of 97 percent. Winter wheat emerged was at 86 percent, compared to 95 percent last year. Winter wheat condition was 6 percent very poor, 8 percent poor, 32 percent fair, 49 percent good, and 5 percent excellent. This is the final weekly Crop Progress and Condition report for 2018. Monthly reports will be released January through March, with weekly reports resuming in April 2019. Thank you to all of our reporters for their hard work this year.
